DETAILED ACTION

Acknowledgment is made of the amendment filed on July 09, 2007. Claims 120-140 are currently pending.

Election/Restrictions

1. The amendment filed on July 09, 2007 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because:

the elected invention is drawn to a method and system for reading an optical code having two different modes (a first and a second) of operation, the first mode for generating a set of scan lines and a second mode for generating a second set of scan lines wherein the second set of scan lines includes less scan lines than the first set of scan lines; whereas the non-elected invention of the remaining claims are drawn to a method and system for determining orientation of data which corresponds to an optical code and determining whether the orientation is within an orientation threshold.

The non-elected invention of the remaining claims may be implemented in applications other than those that the elected invention may be implemented for use with. The applications of the non-elected invention of the remaining claims include assisting a scanner user in arranging a scanner and/or code in proper association to one another.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in

Art Unit: 2876

order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
